

RENEWABLE FOODS

ESTABLISHMENT

CORPORATE PROFILE & PROCUREMENT GUIDE

RIYADH, SAUDI ARABIA

CR: 312804799400003

OUR VISION

Strategic Synergy in Food Processing.

Renewable Foods Establishment is a specialized manufacturing hub designed to solve the operational friction of the HORECA sector. Based in Riyadh, we eliminate the labor-intensive "pre-kitchen" phase, allowing businesses to scale their operations with absolute consistency.

MANUFACTURING EXCELLENCE

Operating a state-of-the-art facility, we utilize industrial technology to process raw agricultural goods into ready-to-use menu components. From high-capacity potato stripping to precise fruit dicing, every product undergoes a rigorous quality control check for size, hygiene, and freshness before it leaves our loading docks.

"Our Goal is simple: 0% prep time in your kitchen and 100% yield from your budget."

THE INDUSTRIAL ADVANTAGE

How we optimize your procurement budget:

Organized Storage: Stackable, food-grade boxes designed for maximum cold-room airflow and efficiency.

Reliable Fleet: Precise temperature-controlled logistics ensuring day-of-delivery freshness across Riyadh.

Zero Organic Waste: Stop paying for peels and bruised discards. Every kilogram you buy is a usable ingredient.

Fixed Costing: Eliminate the guesswork of preparation yield. Your procurement cost is your actual plate cost.

Space Optimization: We deliver pre-packaged solutions that take up 40% less cold-storage space compared to raw sacks.

FRESH POTATO PRODUCTS

Potato Variety	Region of Origin
Hormoz	Hail, Saudi Arabia
Santana	Industrial Grade
Jelly	Premium Grade

Standard Cuts: 4x4mm | 6x6mm | 8x8mm | 10x10mm | Crinkle-Cut | Cubes
